

ABSTRACT

It is a web-based application that provides a system for needy children who are unable to get an education. Through donors and NGO's, the needy children will be able to get an education. It is also a good platform for people who want to donate their money. Basically donors and NGO's will pay the fees of those children who can't afford the fees through our system .The goal of this project is to minimize illiteracy, and our second purpose is to bring transparency in donation.

METHODOLOGY

- In the student portal student get registered through our application then student submit the case after submission of case admin verify the student and confirm student after that student case live.
- In the donor portal donors get registered through our application then donors see the student case and choose the student for donation.
- In the NGO's portal NGO's get registered through our application and donate the money for student in the absence of donor. It will be only active when a donator slips for any reason.
- In the school portal schools get registered through our application and see the list of their registered donors and students.

OBJECTIVES

Through donation, education is available for people. As we have clients for this project, donors and NGO's provide education to needy children to make them educated. Taaleem (Education for All) primary goal is to promote education.

FEATURES

Taaleem (Education for all) will provide us a number of features:

- Registration/Login Page
- NGOs Portal
- Student Portal
- Taleem System (Admin Portal)
- Donor Portal
- School Portal
