

# MECHANIC BULAO

## Abstract:

Mechanic Bulao is an android based application we have designed and implemented for the purpose of finding auto mechanics that is near you based on your current location or area. We have implemented all the basic functionality to cover the scenario of problems of broken vehicle faced by people anywhere.

## Features:

Our application will help people locate and contact nearby mechanics according to their needs. The users will be able to book appointments for car service with mechanics and will be able to get services at their doorsteps. And users will also be able to manage funds in wallet and pay through in-app purchasing.

## Technology: Kotlin, Firebase Database
